

The image shows a screenshot of an IDE interface. On the left, the Explorer pane displays a project structure with files like HydrationReminder.java, MedicationReminder.java, and others. The Editor pane shows the HydrationReminder.java file, which is a Java class extending WellnessReminder. The code includes methods for logging in, updating email, performing health checks, recording temperature and symptoms, setting reminders, and logging out. The Run and Debug panes at the bottom show the execution output, including timestamps and the completion of tasks.
